PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate specializing in **Python development, Cloud Computing (AWS), and Artificial Intelligence/Machine Learning (AI/ML)**. Possesses a solid foundation in core computer science principles, including Data Structures, Algorithms, OOP, and Database Management Systems. Passionate about leveraging cloud services and intelligent models to solve real-world engineering problems. Ready to contribute technical skills and analytical problem-solving to an impactful software engineering or AI/ML internship.

EDUCATION

Andhra University <i>Bachelor of Technology (B.Tech) in Computer Science & Engineering</i> Cumulative GPA: 7.02 / 10.0 Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks	Visakhapatnam, India Expected Graduation: May 2028
Intermediate (Class XII) - Board of Intermediate Education / SSC Board <i>Higher Secondary Certificate (Percentage: 80.1%)</i>	June 2022 – May 2024 Visakhapatnam, India
Secondary School (Class X) - CBSE <i>All India Secondary School Examination (Percentage: 65.0%)</i>	June 2021 – May 2022 Visakhapatnam, India

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, JavaScript (Basics)
Cloud Computing: Amazon Web Services (AWS)
Databases: MySQL
Tools & Version Control: Git, GitHub
Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)
AI/ML Areas (Currently learning): Supervised/Unsupervised Learning, Neural Network Concepts, Data Preprocessing

PROJECTS & ACADEMIC LABS

AWS-Based Cloud Deployment & Infrastructure Management - Designed and deployed virtual private clouds, configuring security groups and network access control lists (NACLs) to manage traffic flow. - Provisioned EC2 instances, structured relational databases using Amazon RDS (MySQL), and utilized S3 buckets for object storage. - Implemented IAM roles and policies to enforce least-privilege access across resources.	Cloud & Systems Project
Python-Based Data Processor & SQL Integration	Software & Database Project

- Built structured Python scripts to automate data parsing, cleaning, and transformation processes.
 - Developed safe database connectivity functions to store processed data into a local MySQL database.
 - Optimized SQL query execution times by implementing proper indexing strategies during database schema design.
-

CERTIFICATIONS & AVAILABILITY

Certifications: AWS Certified Cloud Practitioner (Amazon Web Services)

Availability: Actively seeking Software Engineering, Cloud Associate, or AI/ML Internships starting immediately.
